

PROGRESS REPORT

- **What was achieved last week?**

Last week I was able to fix the model service files with the proper format.

- **What is the focus of today?**

Today I'm aiming to adjust the design and add the things our Project Manager and the group had planned.

- **What blockers exist?**

The blocker for me this week is the separation and learning of jquery and Ajax.

- **What went well?**

What went well is that I succeeded in my task of separating and following the proper format and adjustments our Project Manager told me.

- **What didn't go well?**

The issue for me is the problem i encounter in my coding, when my code wont run and the web wont direct to the website, but it is fixed the problem is in my code.

- **What should we start doing?**

We should now focus on each task and try to improve the program.

- **What should we stop doing?**

So for me i still dont find any problems because we now tried to communicate more and our project manager did her best in asking us for updates.

- **What should we continue doing?**

We should continue maintaining strong teamwork and clear communication among all members. Collaborating effectively and supporting each other will help us complete the project successfully.
