PROGRESS REPORT

What went well last week?

Had steady progress with the website and managed to setup the main branch properly.

What is the focus of today?

Proper update on clickup tasks and cleaning up on some commits.

What blockers exist?

Community Services

What went well?

Just slight updates on the code. Nothing else in particular.

What didn't go well?

From what I know, so far our front end is having problems running the program.

What should we start doing?

Double time and focus on the activity. Try to conduct more meetings next week and finally set up and start testing the website.

What should we stop doing?

Delaying updates and delaying the project overall.

What should we continue doing?

Continue with the updates and continue striving for a better work ethic.
