

PROGRESS REPORT

- **What was achieved last week?**

I achieved adding a new folder for the frontend Apiservice and ApiProxyController to run smoothly the website.

- **What is the focus of today?**

Today I want to focus on the notification with my group and hopefully connect and end it to the backend.

- **What blockers exist?**

The blocker for me this week is for the new ideas implementation.

- **What went well?**

What went well is that I run my website and so far so good.

- **What didn't go well?**

Is that running the backend to try the connection on my frontend.

- **What should we start doing?**

We should start by letting our tester test the program for errors.

- **What should we stop doing?**

So for me I still don't find any problems as a group because we now tried to communicate more and our project manager did her best in asking us for updates.

- **What should we continue doing?**

We should continue maintaining strong teamwork and clear communication among all members. Collaborating effectively and supporting each other will help us complete the project successfully.
