

PROGRESS REPORT

- **What was achieved last week?**

I achieved fixing the log in part and progress in notification and mail page, but still have things needed to add in them.

- **What is the focus of today?**

Today I want to focus on the mail and notification to be fully functional and maybe if i still have time to change website design.

- **What blockers exist?**

The blocker for me this week is the fixing of the log in to have validations is the user is admin, teacher, or student.

- **What went well?**

What went well is that last week's task was done and I made progress on the website.

- **What didn't go well?**

Is the implementation of the in app mail and notification.

- **What should we start doing?**

We should start by letting our tester test the program for errors, but so far we still want to finish it and both connect the backend and frontend.

- **What should we stop doing?**

So for me I still don't find any problems as a group because we now tried to communicate more and our project manager did her best in asking us for updates.

- **What should we continue doing?**

We should continue maintaining strong teamwork and clear communication among all members. Collaborating effectively and supporting each other will help us complete the project successfully.
