PROGRESS REPORT

What went well last week?

Finished Refactors and Login Logics

What is the focus of today?

Deployment of the API and the notification

What blockers exist?

Some projects that are heavy, to the point that we are making an event. There are also heavy projects, events, and specially mentioned make-up classes that alter our time management where we are supposed to do our task.

What went well?

Almost Finished Refactorization and Added Logics

What didn't go well?

Dont know where to start studying deployment using CI/CD

What should we start doing?

Continue to study and approach the professors if any confusion occurs.

What should we stop doing?

Handing everything on my own without asking for help if problem occurs.

What should we continue doing?

Continue studying not only the problem but the structure for a more smooth and fun experience making the project.
