PROGRESS REPORT

What went well last week?

Done RBAC system

What is the focus of today?

Adding QR Code and Notification

What blockers exist?

Some projects that are heavy, to the point that we are making an event. There are also heavy projects (eg. roleplay X debate, system design and research defense, outreach design, and vlog video with actions)

What went well?

Done RBAC System and Authorization, Done Attendance Logic and Refactorization

What didn't go well?

Recognizing auth mapping, its kinda hard due to lack of materials. AI can't help since it just throw random stuff according to my question and only my questions is answered. I'm like skipping classes then attend a lesson after a day.

What should we start doing?

Find better materials to study and follow, not just blindly use what finds on the net.

What should we stop doing?

Handing everything on my own without asking for help if problem occurs.

What should we continue doing?

Continue studying not only the problem but the structure for a more smooth and fun experience making the project.
