

PROGRESS REPORT

- **What was achieved last week?**

Last week, I added the needed separation of the control folder to Model and Services folders, and was able to update the design.

- **What is the focus of today?**

Today I'm aiming to adjust the design and connect to the new updates of the backend.

- **What blockers exist?**

The challenge I face is learning the new folders added and how to connect it again to the backend.

- **What went well?**

What went well is that I succeeded in my task last week given to me by our project manager.

- **What didn't go well?**

One issue for me is trying to connect again to the files because of the new made folders.

- **What should we start doing?**

So far our task right now is smooth because we followed and done the task given to us, the updates our instructor gave.

- **What should we stop doing?**

So for me i still dont find any problems because we now tried to communicate more and our project manager did her best in asking us for updates.

- **What should we continue doing?**

We should continue maintaining strong teamwork and clear communication among all members. Collaborating effectively and supporting each other will help us complete the project successfully.
