

PROGRESS REPORT

- **What was achieved last week?**

I achieved a connection in the deployed API and changed some things in the frontend.

- **What is the focus of today?**

Today I want to focus on the changes and complete on getting the data from the deployed API.

- **What blockers exist?**

The blocker for me this week is connecting and getting the data from the deployed API

- **What went well?**

What went well is that last week's task was done and I made progress on the website.

- **What didn't go well?**

Is the deployment connection, because i still can't get the data from the deployed API.

- **What should we start doing?**

We should start by letting our tester test the program for errors, but so far we still want to finish it and both connect the backend and frontend especially the deployment.

- **What should we stop doing?**

So for me I still don't find any problems as a group because we now tried to communicate more and our project manager did her best in asking us for updates.

- **What should we continue doing?**

We should continue maintaining strong teamwork and clear communication among all members. Collaborating effectively and supporting each other will help us complete the project successfully.
